

## BC Coastal Soccer League

### Operations Management

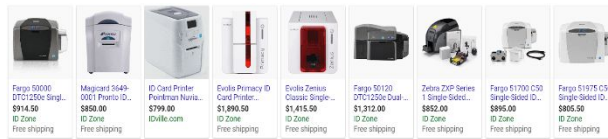

#### **Card printing**

Player cards are optimized for digital delivery of a card to the individual and/or printing with a Printer for “Laminated Cards”. They can also be printed multiple to a page to blank card stock when that is needed.

#### **Single card (Laser)**

Cards can print to a laminated card using a special printer and laminated card stock. These have been found to be a preferred option by some organizations.

Possible options for a printer are shown below though Stack Sports does not have any recommendation for a specific model.

#### **Multiple Cards per page**

Recommend you download file and use Adobe PDF Reader and not attempt to print from a web browser view.

Settings in Adobe PDF Reader to print multiple cards per page. To only print specific cards, select the page number of the exact cards you want printed.
