

BCCSL

Updating Rosters after a Player has Stats

The system is designed to protect roster integrity for Players that have “Stats”. A player can be “Re-Registered” and then added to another team as their primary roster.

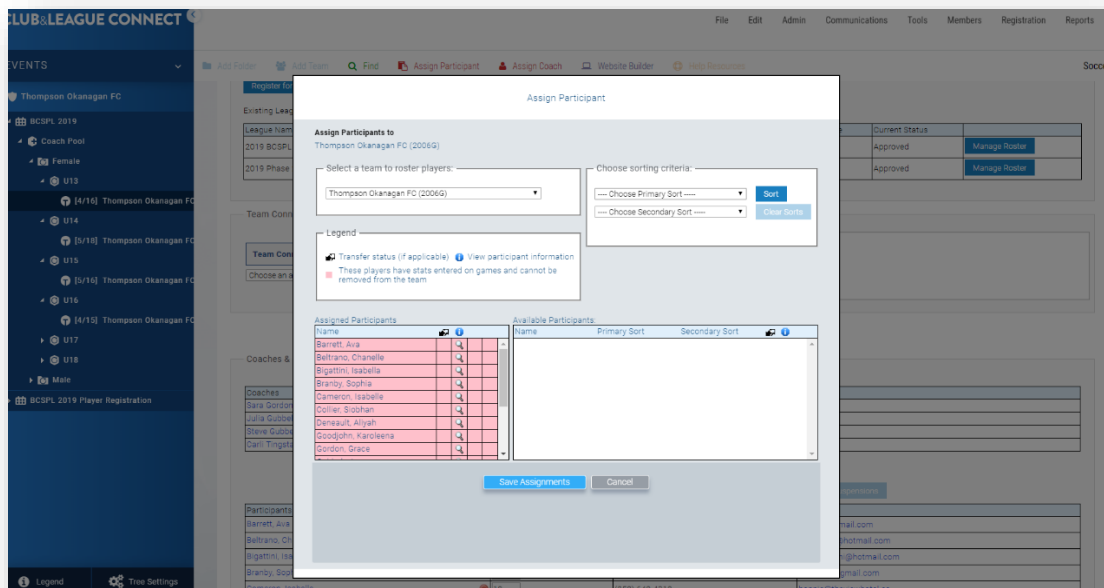

“Re-Registered” creates the ability to add to another team while leaving a record behind in the “Manage Roster” view to maintain a historical record of “Stats”.

“Stats” are any history in the event, listed on roster for a played game, goals, cards, etc. The player may not have actually been on the field only listed on the roster on a date that a game was played.

The Working Roster - Does not allow you to remove players with Stats & Playing History using “Assign Participant” but you can add new players.

The Working Roster - is NOT the “Game Day Roster” but was used to create your pre-season Roster as a base to work from.

Any new players you have added to your Club can be dragged from the right (Available) to left (Assigned) to add to the working roster.

Note: Once a player has stats, they will appear in pink and “Re-Register” will need to be used to move them to another team.

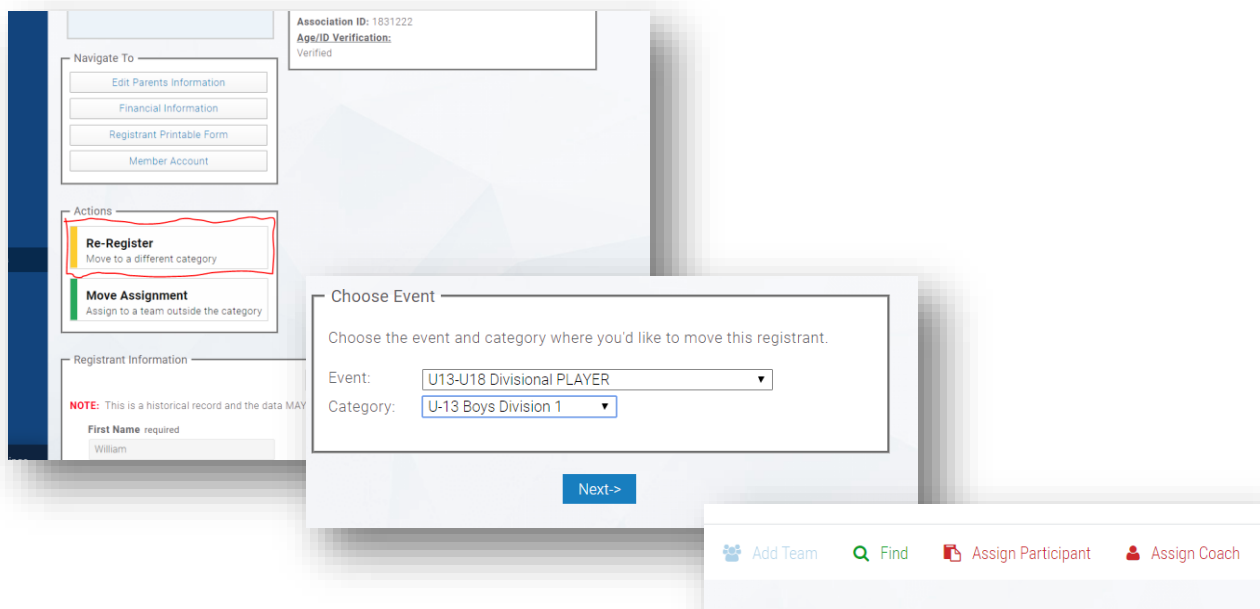

Re-Register

To move a Player off a team and/or move to a new/same Category to make available to “Assign Participant” to another team, you will need to “Re-Register” them if they have “Stats”.

Many players have “Stats” even though it may not be expected that they would. “Stats” are any history in the event, listed on roster for a played game, goals, cards, etc. The player may not have actually been on the field only listed on the roster on a date that a game was played.

To “Re-Register”:

1. Select the player by clicking on their name from the [Find] screen or the Team Working Roster.
2. Click on [Re-Register]
3. Select the “Event” and “Category” were the team you wish to move the player to is located.
4. Finish the on screen steps to complete the move to the desired Category.
5. Use [Assign Participant] to add them to the team.

The screenshot shows the 'Re-Register' process in the StackSports system. The main interface is partially visible, showing a sidebar with navigation options like 'Edit Parents Information', 'Financial Information', 'Registrant Printable Form', and 'Member Account'. The 'Actions' section is highlighted, with 'Re-Register' (Move to a different category) and 'Move Assignment' (Assign to a team outside the category) visible. The 'Registrant Information' section shows a note: 'NOTE: This is a historical record and the data MAY' and a field for 'First Name' with the value 'William'.

Overlaid on the main interface is a 'Choose Event' dialog box. It contains the following text and fields:

Choose the event and category where you'd like to move this registrant.

Event:

Category:

Next->

At the bottom of the screen, there is a navigation bar with the following options: [Add Team](#), [Find](#), [Assign Participant](#), and [Assign Coach](#).

The **Manage Roster feature** allows tracking of player participation, stat and discipline history, while still allowing a Roster to be updated by the Club for the upcoming season.

Note: Once a player has stats, they will appear locked on this screen and you will need to “Re-Register” to deactivate and move to a new team. They will still be listed on this screen for historical purposes.

Note: do not use the print feature from this page – “Game Day Roster” is available from your list of games. See the Game Day Operations guide on the BCCSL help page.
